

14 January 2020

Dear Parent/Carer,

Year 10 Science Examination

I am writing to inform you that your son/ward will be taking a science examination on **Thursday 5 March**. It will take place in the Sports Hall. The examination will cover all topics in biology, chemistry and physics that have been taught this year. A detailed revision list will be emailed to your son/ward.

Students are to head to the gym immediately at the end of break, placing their belongings in the 140 corridor, as per school examination procedures. This is to ensure that the 1 hour 30-minute examination starts on time. The exam is due to finish by 1.00pm.

The results of this examination will be used to determine any Year 10 GCSE set movements, so it is essential that your son/ward spends time at home revising in preparation.

A few revision tools that your son/ward can use to study are:

- CGP revision guide
- <https://www.youtube.com/user/myGCSEscience> - revision videos
- <http://www.bbc.co.uk/education/levels/z98jmp3> - BBC Bitesize

Thank you for supporting your son/ward through this important period of time.

Yours faithfully,

Miss N Stead
Curriculum Leader - Science
